Rainwater Outlet

	**Step 1** Place rainwater outlet through the pre-cut hole and mark around it using a crayon or similar.
	Step 2 Prime the underside of the rainwater outlet and 1cm beyond the marked area on the rubber using a Scrubber Pad and handle. Allow both surfaces to dry.
	**Step 3** Mate the surfaces together and compress with silicone roller.
	**Step 4** Round the corners of the 12” Flashing Tape (Rainwater Flashing Kit) with scissors and neatly position over outlet. Mark the perimeter with crayon.

	**Step 5** Prime the rubber and outlet using the Scrubber Pad and handle and extend primer beyond the crayon line by 2cm.
	**Step 6** Once touch dry, neatly position the 12" Flashing Tape and carefully remove the backing paper. Roller firmly in place and use a sharp blade to carefully cut out the hole.
